

Starters and Alternators

100 new commercial and heavy duty part numbers added to the range

Advanced compact design, OE quality manufacture and powerful performance are the exceptional standards behind DENSO's replacement Starters and Alternators – bringing world-class rotating machine technology direct to the aftermarket.

Founded on this global expertise, DENSO offers an OE specification Starters and Alternators programme for the independent aftermarket. As well as delivering unique automotive applications, the programme is now being updated with a dedicated product line-up for commercial and heavy duty applications.

The range extension will contain 100 AM part numbers (DAN2XXX/DSN2XXX) which cover over 150 OE references. This means wider OE coverage and a compact AM range.

This will allow our range to cater for key applications from commercial vehicles to agricultural and forklift trucks, as well as equipment operating off-road in different environments such as industrial, construction, marine. The range covers a variety of OE makes such as Case, Caterpillar, Cummins, Isuzu, Komatsu, Kubota and many more.

All items are premium, OE quality, brand-new units. They are supplied as direct fit, without the need for any additional ground, clip cord, connecting cable, or repair kit.

DENSO ensures a high quality product made from genuine parts, at a competitive price, that is durable and dependable so that you don't have to worry about downtime.
