

## Alternator DAN1111

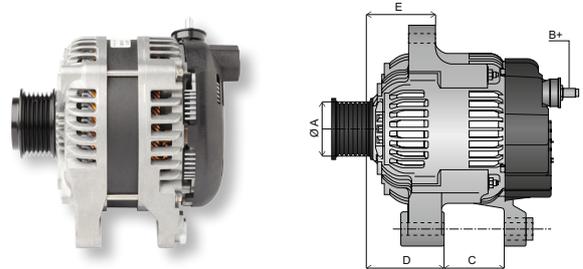

### DAN1111: Coverage

We are pleased to announce that part number DAN1111 (104210-6360), currently available in our AM range, also covers the applications linked to part number 104210-6361.

- > Originally covered LR RANGE ROVER EVOQUE 2.2D (OE ref: BJ32-10300-AC / LR028116).
- > Can also cover JAGUAR XF 2.2D (OE ref: BJ32-10300-AC / C2Z17063 & BJ32-10300-AD / C2Z31658).
- > Compact size High-Output SC Alternator: DENSO further improved the stator coil connection method of the SC alternator for a higher output in a compact size. To counteract the higher heat production due to a greater output, DENSO increased the surface area of the rectifier cooling fins to nearly twice the size of conventional fins, improving the cooling ability of the rectifiers.
- > Integrated LIN technology allowing coverage of vehicles featuring Intelligent Stop-Start system and Smart Regenerative Charging.
- > This single Part Number allows a full DENSO coverage for this application range including automatic and manual transmission vehicles. This represents a carparc coverage of 209.551 vehicles across EU with almost half in UK & IE.
